

Dear President / Secretary General,

The Anti-Doping Commission of Malta is committed to educate our athletes in an attempt to reduce the incidence of use of prohibited substances and doping methods among our athletes. UNESCO supported one of our initiatives and as a result NADOMALTA has produced a set of 3 short videos with an anti-doping message which were aired on TVM2 during the last 6 months.

We would like to work with your organisation to educate your athletes. As a start we are sharing the links to the set of videos on the NADO's official website, YouTube and Facebook, and encourage you to use the videos to educate your athletes. These links can be sent to your athletes by email, put on your website or social media and also shared with affiliated clubs to be forwarded to all the registered athletes.

We encourage you to make use of these videos as we believe that education is the way to beat doping in sport. We would appreciate it if you could share with us your social media sharing of our videos and any feedback that you might have regarding this initiative.

We thank you for your cooperation and look forward to working together in the future to keep sport clean.
